

PERFORMANCE 130

PROVEN BY EXPERIENCE
DESIGNED FOR PERFORMANCE

ROOTED IN NATURE. SHAPED FOR SPORT.

PRODUCT DESCRIPTION

Performance 130 is a natural infill for artificial turf systems made from cork granules, with a particle size ranging from 1 to 2 mm.

Remark: material is being tested and certified according to EN-15330-5 norm, NF P 90-112 and KNVB

NATURAL & RENEWABLE

SAFE & DURABLE

COMFORT & PERFORMANCE

KEY FEATURES

SPORTS PERFORMANCE

- Strong energy absorption to help reduce the impact of falls
- Low energy return, for greater player comfort
- Elastic behaviour and resistance to compression
- Enhanced rotational friction characteristics

PITCH FUNCTION

- Helps lower surface temperature
- Supports the artificial turf pile
- Improved playability
- Resistant to decay
- Flame-retardant properties

SUSTAINABILITY

- 100% natural, renewable and recyclable
- No chemical contamination, 100% free according to REACH
- Odourless, nontoxic and non-allergenic

cork granules
1 - 2mm
(less than 5% below 0.85mm)

PHYSICAL AND MECHANICAL PROPERTIES

Cork granule size (mm)	1 - 2
Bulk density (kg/m³)	110 - 130
Moisture content (%)	<12

IMPORTANT INFORMATION - The figures shown are typical product values and are provided for information; they are not a purchasing specification and do not, by themselves, confirm suitability for a particular installation. The customer and/or installer must verify that the complete artificial-turf system, including all components and the installation method, provides adequate drainage and is suitable for its intended use. Incorrect product selection or installation may cause product damage or personal injury.
